

Product Overview

System Overview

The NAMS® Centralized utilizes the latest technology in both hardware and software and can run under Unix or Solaris on the Intel or Sun hardware platform. NAMS utilizes Oracle's Enterprise database for speed and scalability and has a web-enabled GUI for a problem free user interface. For convenience, reports can be scheduled to run automatically and be delivered to the user(s) via email. The NAMS® software is modular and can support a minimum configuration initially with a clear and economical path for upgrade at a later date.

Software Modules Available

- Collection & Mediation
- AMA/CDR Search & Reporting
- Phantom Tracker
- Traffic & Engineering
- Operations Package
- Tandem Transit Usage Statements & Reporting
- Fraud Detection/Prevention
- NetPlan
